Annual Report

Council for
Social & Digital
Development

Who Are We

Council for Social & Digital Development

The Council for Social and Digital Development (CSDD) stands as a trailblazing research and policy advocacy organization, strategically located at the vibrant crossroads of technology and society. With its headquarters in Guwahati, Assam, within the culturally enriched and predominantly tribal expanse of North East India, CSDD is committed to expertly navigating the intricate landscape where digital progress converges with the diverse tapestry of society.

Key Points

- Research and Policy Advocacy
- Technology and Society Intersection
- North East India Focus
- Evidence Building and Narratives

At Council for Social & Digital Development (CSDD), we strive to unravel the complexities of emerging digital and society-related issues, offering unique insights and evidence-building initiatives tailored to the specific context of North East India.

Vision: Empowering Communities, Inspiring Change

The Council for Social & Digital Development aims to harness technology's transformative power for positive societal change, creating a digitally inclusive and socially harmonious environment in North East India. Through research and policy advocacy, we strive for equitable distribution of digital innovation benefits, leaving no community behind

Mission: Bridge-Building for Inclusive Digital Futures

CSDD is on a mission to be a catalyst for inclusive digital development in North East India. Our commitment is reflected in our multifaceted approach

-
- **Evidence Building:** Conducting comprehensive research to inform policy decisions and strategies.
 - **Narrative Creation:** Crafting meaningful narratives that highlight the unique digital and societal landscape of North East India.
 - **Advocacy:** Advocating for policies that ensure the responsible and inclusive integration of technology into the region's social fabric.
 - **Community Engagement:** Engaging with communities to understand their needs, challenges, and aspirations, and co-creating solutions for a digitally vibrant and socially inclusive future.

Through these pillars, CSDD endeavors to build bridges between technology and society, fostering a harmonious coexistence that embraces progress while preserving the rich cultural diversity of North East India.

EVIDENCE BUILDING:

NARRATIVE CREATION

ADVOCACY

COMMUNITY ENGAGEMENT

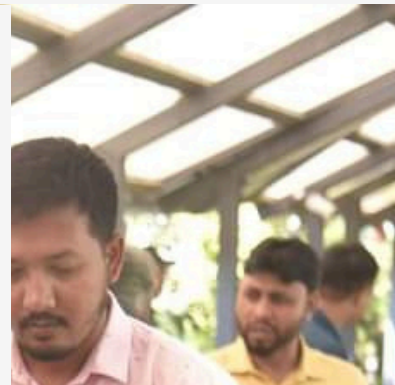

THEMATIC AREAS

CSDD's work is strategically organised into three thematic areas that serve as focal points for our initiatives:

Research & Advocacy, Implementation, and Knowledge Networks.

These areas represent the core domains through which we channel our efforts to navigate the complex intersection of technology and society. Through meticulous research and targeted advocacy, we strive to influence policies that address emerging challenges.

Our Implementation initiatives bring theoretical solutions into practical realms, fostering tangible impact. Concurrently, our participation in Knowledge Networks underscores our commitment to collaboration, facilitating the exchange of insights and forming partnerships to collectively shape the evolving landscape of social and digital development.

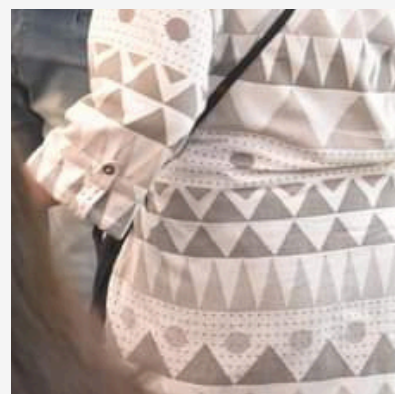

Knowledge
Networks

Research &
Advocacy

Implementation

Research & Advocacy

Committed to leveraging technology for societal improvement in Northeast India, the Council for Social & Digital Development spearheads transformative endeavors. Our dedication to Research & Advocacy is apparent in the thorough analysis of baseline data, resulting in meticulous baseline and endline reports for a range of projects. The overview above encapsulates key initiatives, underscoring our commitment to fostering a digitally inclusive future.

Research

INCREASING CYBER CRIMES THREATENING DIGITAL FREEDOM AND RIGHTS OF WOMEN

A Study in Mapping of Digital Vulnerabilities of Women in Assam

According to the data from the National Crime Records Bureau, a total of 50,035 cases were registered under cyber-crimes in 2020, showing an increase of 11.8% in registration over 2019 (44,735 cases). 60.2% of cyber-crime cases registered were for the motive of fraud (30,142 out of 50,035 cases) followed by sexual exploitation with 6.6% (3,293 cases) and Extortion with 4.9% (2,440 cases).

Among states with at least 1,000 cases, Telangana (87 per cent) and Gujarat (64 per cent) saw the most severe rise. The northeastern state of Assam followed at third, with 58 per cent growth. In terms of the crime rate, or cases relative to every 1 lakh people, Assam again stood at third, with a rate of 10.1 (one case per 10,000 people). This was behind Karnataka (16.2) and Telangana (13.4). Crime rate against women in Assam is 154.3, which is almost thrice the national average of 56.5.

This research study aims to understand cyber-crimes in Assam (urban and rural) where they are at rise with other determinants of gender inequality. Assam has seen overall crimes against women as well as cyber-crimes against women at rise. The project seeks to understand what are the major ways women are targeted in the online space, how far this is related to the state of women in the particular state, their own agency, freedom, and education level. Do different women face cyber-crime differently?

This study involved
225 women
respondents from
multiple districts of
Assam.

Budget: 1,67,000.00

2022-2023

FROM SMALL TEA GROWERS (STGS) TO SMALL TEA ENTREPRENEURS (STES)

Unlocking the Potentials of the Small Tea Growers in Assam towards Formalisation and Entrepreneurship and Through Access to Digital Technology and Opportunities

Assam is the single largest tea-growing region in India, producing over 700 million kgs annually. Within the tea supply chain, the Small Tea Growers (STGs) have grown exponentially over the last 40 years. In 2022, Assam had 120,000 STGs, whose contribution to the total tea output was 52% – generating livelihoods for thousands of households and contributing significantly to the economy. Despite their contribution, a majority of STGs operate as subsistence farmers who face challenges of aggregation at the farm gate level, are vulnerable to price volatility, and lack the capacity to mitigate climate change shocks. There are important issues related to finance, loans, informal associations, no formal structure to date (very limited), cost of production, and quality of production.

FROM SMALL TEA GROWERS (STGS) TO SMALL TEA ENTREPRENEURS (STES)

Unlocking the Potentials of the Small Tea Growers towards Formalisation and Entrepreneurship and Through Access to Technology and Opportunities

A brief Study
December, 2023

These are issues that came to the limelight during our recent interactions with some of the STGs in 3 districts of Assam – Dibrugarh, Jorhat, and Tinsukia, from August – October 2023. There are opportunities and scope for Integrated Cluster Development for STGs. The major issues that STGs face will require a policy intervention but what can be done is seeking to address the low-hanging fruits, and transform the informal STGs into formal STGs by creating cooperatives/ FPCs.

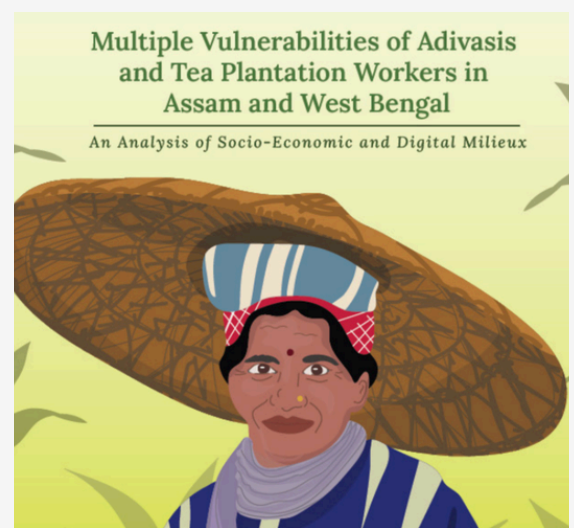

MULTIPLE VULNERABILITIES OF ADIVASIS AND TEA PLANTATION WORKERS IN ASSAM AND WEST BENGAL

An Analysis of Socio-economic and Digital milieu

This study involved key **53** stakeholders and **120** respondents.
Budget: INR **1,33,000.00**

Based on in-depth research on the socio-economic and digital milieu of the Adivasis and the Tea plantation workers in the state of Assam and West Bengal, India this study provides an overview of the poorer living conditions, lack of basic amenities, low wages and precarious working conditions of the Adivasis and the tea plantation workers in Assam and West Bengal. The study also analyses the gaps in the provisions of the Plantation Labour Act of 1951 and the real conditions in the Tea Gardens. This study focuses on the idea that the digital geographies cannot be studied in isolation without bringing in the physical, social, economic and cultural materials to the study.

These are issues that came to the limelight during our recent interactions with some of the STGs in 3 districts of Assam – Dibrugarh, Jorhat, and Tinsukia, from August – October 2023. There are opportunities and scope for Integrated Cluster Development for STGs. The major issues that STGs face will require a policy intervention but what can be done is seeking to address the low-hanging fruits, and transform the informal STGs into formal STGs by creating cooperatives/ FPCs.

REALISING THE SOFT POWER OF MUSIC OF NORTH EAST INDIA REGION AS AN ECONOMIC FORCE

This study involved mapping more than **80** stakeholders.
Budget: **INR 80,000.00**

The North East Region of India, with immense cultural and indigenous diversity, serves as a prime example of soft power's potential in economic, cultural, diplomatic, and political realms. By nurturing the arts and culture, the region not only augurs well for career opportunities, but also offers a connecting bond to overcome ethnic strife and frictions, fosters cultural diversity and regional, national and international cooperation, aligning with India's 'Look East' and 'Act East' policies. Strategic investments in cultural infrastructure and music could unlock significant potential, aiming for a sustainable, inclusive and progressive cultural ecosystem by 2047

UNLOCKING THE SUNRISE SPORTS SECTOR IN NORTH EAST INDIA

This involved mapping and analysing **50** stakeholders in this sector.
Budget: **INR 80,000.00**

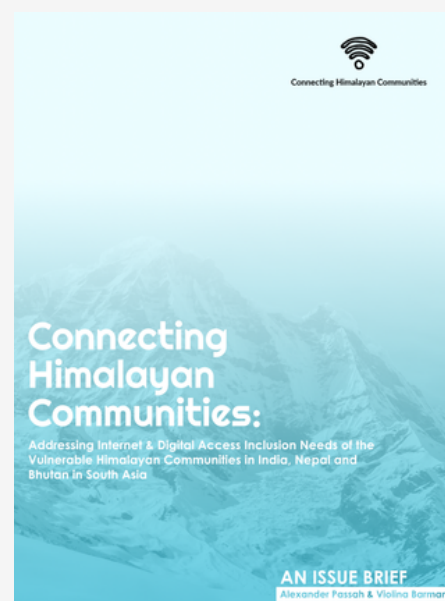

The region has its share of sporting issues stemming from insufficient sports and youth policies and funding, increased and improved sports infrastructure, inadequate coordination amongst various sports bodies, professionalism in sports bodies and processes, the need for capacity building to harness schemes and explore new streams of revenues like PPP and CSR funding, etc. While the region continues to surprise with more sporting talents and its demographic dividends yielding potential benefits for the sports sector here, it amplifies the louder need and scope for promoting the very nascent sports industry, around key notable sports and sportsmanship.

CONNECTING HIMALAYAN COMMUNITIES

Addressing Internet, Digital Access & Inclusion Needs of the Vulnerable Himalayan Communities in India, Nepal and Bhutan in South Asia: An Issue Brief

This study involved mapping the connectivity issues in all the **8 States** of the Region.
Budget: **INR 1,15,000.00**

Internet and technology are constantly changing the way humans navigate their socioeconomic worlds. Yet, internet access is not universally accessible, and most communities are in a state of transition. Pressing issues have emerged, such as the digital divide, misinformation, surveillance and inequalities in the digital economy. The prospects of digitalisation among Himalayan communities that can catapult discoveries and provide sustainable solutions to everyday challenges experienced by these communities are real, including dealing with climate change and environmental challenges with technology support. The Himalayan communities are diverse and rich in cultural heritage occupying eco-sensitive zones. These communities face a dual crisis of underdevelopment and are simultaneously vulnerable to climate change

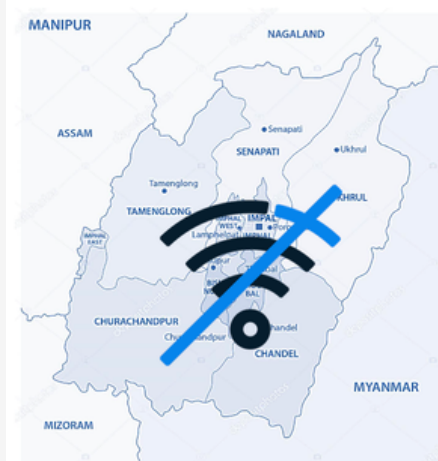

SILENT NETWORKS: ASSESSING SOCIAL, ECONOMIC, AND PSYCHOLOGICAL THREADS OF EXTENDED INTERNET SHUTDOWN IN MANIPUR IN NORTH EAST INDIA

The purpose of the assessment was to understand the social, economic, psychological, and digital impacts of a prolonged internet shutdown resulting from ethnic violence between two tribes, Meitei and Kuki, in Manipur in the North East Himalayan Region of India, bordering Myanmar, during second half of 2023. This assessment aimed to gather firsthand insights from individuals affected by the shutdown to inform larger society, stakeholders, and humanitarian organizations about the consequences of such actions. By examining the experiences and perspectives of those directly impacted, the assessment sought to highlight the urgency of addressing the adverse effects of internet shutdowns on communities, promote dialogue for conflict resolution, and advocate for measures to prevent or mitigate future disruptions in similar contexts.

Budget: INR 77,000.00

"Silent Networks: Assessing Social, Economic, and Psychological Threads of Extended Internet Shutdown in Manipur in North East India"

CLIMATE CHANGE IMPACTS ON EXISTING LIVELIHOODS OF TEA PLANTATION WORKERS & FAMILIES DEPENDENT ON THE TEA PLANTATION SECTOR IN ASSAM AND HIGH NEED FOR ALTERNATIVE LIVELIHOODS SKILLS AND OPPORTUNITIES

Research into likely future climate change projections for northeast India, which predict further increases in temperature and uncertain variation in precipitation ([Dash et al., 2012](#)), has been undertaken, but there remains a large tea-climate research deficit for the region which needs addressing, particularly in terms of enhancing evidence-based climate change adaptation of tea landscapes for sustaining livelihoods. This shortfall is echoed by a recent bibliometric review undertaken by [Marx et al. \(2017\)](#) which highlighted the deficit of explicit analyses of global climate warming impacts on tea production landscapes. Moreover, research on alternative livelihood source of tea workers due to effect of climate change are also scarce. To address all these issues, the present study tries to explore the secondary resource available around the considered theme.

This study involved **33** women Self Help Groups (SHGs) from the Tea Tribe and Adivasi Community.
Budget: **INR 82, 000.00**

THE RIGHT TEACHER FOR EVERY CHILD STATE OF TEACHERS, TEACHING AND TEACHER EDUCATION: REPORT FOR INDIA 2023

In the backdrop of these national and international developments, this second report⁵ on the State of Teachers, Teaching and Teacher Education for India 2023 (SOTTTER 2023) focuses on issues concerning the teaching profession and teacher preparation in India. The report is based on eight background research papers that used primary and secondary data⁶ including UDISE+ 2021-22, Periodic Labour Force Survey 2021-22, the SOTTTER 23 Survey of schools and teacher education institutions carried out in Eight States, and TET data from One State A.

The analyses examine the demographic profile of teachers in different sectors, the working conditions of teachers, and the availability and supply of teachers in general, and specifically of qualified teachers, in the system. Comparisons are made between states, between urban and rural locations and between the government and private sectors.

This study involved **40** government schools in Assam and 11 TEIs.
Budget: **INR 1,45,000.00**

Advocacy

Sustaining Digital Innovations in Rural India for Inclusion & Development: *A Briefing Paper*

This briefing paper explores the challenges and opportunities associated with digital innovations and solutions for inclusion and empowerment of rural India, in a connected society and economy. It highlights the potential of technology-enabled solutions to positively impact rural livelihoods, education, health, and other critical sectors, while addressing the unique challenges of rural communities. The brief highlights the need for inclusive and sustainable efforts to see such innovations bridge the digital divide and promote economic and social growth in rural India.

Budget: INR 61,000.00

Digital Injot (Light): Tea Tribe & Adivasi Community Empowerment in Assam (India) in A Digital Age

This stakeholders meet engaged more than **100** stakeholders from the Tea Tribe & Adivasi community in Assam.
Budget: INR 2,23,000.00

The purpose of the discussion, held on April 5, 2023, in Dibrugarh in Assam, was to look in to the impact of digital technology and access on the Tea Tribe and Adivasi communities in Assam, India, and explore how technology can be leveraged to empower the community. the consultation concluded that digital technology has the potential to empower marginalized communities in Assam, but it requires a concerted effort from government, civil society organizations, and the private sector to ensure that these communities have access to the necessary resources and support to fully benefit from the digital age.

Bridging the Digital Divide for Girls in India: Logging Her in!

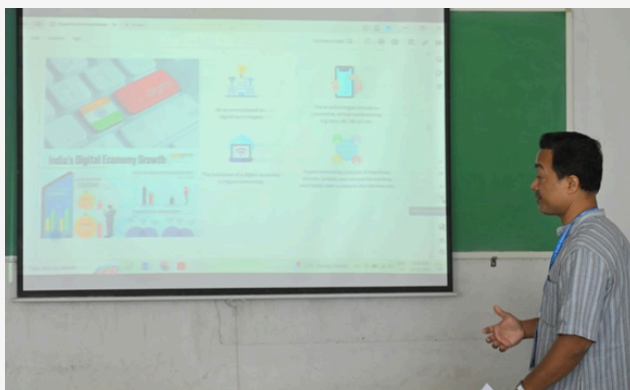

CSDD contributed in this chapter for this book on 'Transforming Unequal Gender Relations in India and Beyond: An Intersectional Perspective on Challenges and Opportunities,' published by Springer. This chapter brings focus on how the digital divide is affecting adolescent girls and highlights the key areas that can help bridge the gendered digital divide for girls in India, by presenting an on-the-ground reality of adolescent girls amidst socio-economic challenges such as staggering family incomes, job insecurities, slow health services, lack of access to critical information and social benefits and loss of attendance in school, with a specific focus on state-wise differentiation in access to digital devices and services for adolescent girls.

Budget: INR 65,000.00

Digital Environmental Sustainability through Circular Economy and Sustainable Design Solutions

CSDD and DEF organised a session during APRI GF 2023, held in Brisbane, Australia, in hybrid mode, on August 30, 2023. The session focused on overarching theme on 'Emerging Technologies' and how and why the Asia-Pacific Region needs to look at these issues around digital environmental sustainability to balance tech need with environmental priorities.

Budget: INR 55,000.00

South Asia Consultation On 'Understanding & Tackling Harms of Digital Tech on Environment and Climate in South Asia: Balancing Digital Rights & Environmental Sustainability Through Digital Circular Economy'

The Council for Social and Digital development (CSDD), and the Digital Empowerment Foundation (DEF), with the support of the Association for Progressive Communication (APC), hosted a Virtual South Asia Consultation on 'Tackling Harms of Digital Tech on environment and climate in South Asia' which was dedicated to prioritise issues, challenges, need and to finding innovative solutions that can help strike a balance between fulfilling our digital needs and rights while upholding environmental and climate rights and justice. The Workshop was held on December 14, 2023, from 11 am to 1.30 pm IST (5.30 am – 8 am UTC) Online via Zoom Webinar.

Budget : INR 60,000.00

Implementation

Over the past year, the Council for Social & Digital Development has actively executed diverse projects, showcasing our commitment to translating ideas into impactful actions. Explore the following pages for details on our implementation efforts, a testament to our ongoing pursuit of positive societal change and digital development.

Financial Literacy Camps Under Depositors Education and Awareness Fund (DEAF)

CSDD conducted 10 financial literacy camps for the farmers under Krisarthak initiative for the FY 2023-24. The financial literacy camps will be conducted under Depositors Education and Awareness fund sponsored by Reserve Bank of India (RBI). Role of CSDD was to mobilise the farmers and organise the workshops. It was supported by the Indian Institute of Bank Management (IIBM), Guwahati, Assam.

This project reached out to **300** community beneficiaries in Assam with financial literacy and education.
Budget: **INR 2,20,000.00**

Krisarthak: Enabling 2,50,000 farmers in Assam with Financial Education and Counselling (FEC) Digitally

The Krisarthak Financial Education and Counselling (FEC) assignment, supported by the World Bank and implemented under APART by ARIAS Society, reached out to **2000 farmers in 6 districts of Assam**. The Fourth Cycle (February–April 2024) introduced core FEC digital solutions based on insights from the previous cycle. By April 2024, the project had impacted 145,417 farmers across twenty districts. This initiative is led by a consortium, including the Digital Empowerment Foundation, Council for Social and Digital Development, Fair Climate Fund, and IIBM, with a **budget of INR 2,01,000**. The project has empowered farmers with financial education, counselling, and ICT tools to boost rural entrepreneurship.

Skill Yatra: Career Counselling for youths in Assam

The Skill Yatra project started in the month of September 2023. The Project Sponsored by the Assam Skill Development Mission (ASDM), Implementation by a collaborative effort between Unifiers Social Ventures Pvt. Ltd., New Delhi as the Leading Organisation (Vendor) and Council for Social and Digital development (CSDD), Guwahati, Assam, as the Local State partner, aimed to enhance skill awareness and career guidance among the youths in Assam to Create awareness on Skilling and career development. This report summarizes the project's key activities and outcomes during its 2nd Phase of implementation within 60 days period within 10 Districts of Assam. In both phase 1 and 2, the project reached out to 25000 youths at high school and college level.

Budget: INR 221,000.00

Digital Skilling for Livelihood, Employability, and Entrepreneurship (DSLEE) for Youths of Tea Tribe & Adivasi Community (TTAC) in Assam

This pilot project was implemented during September – December 2023, by CSDD with support of NIELIT, for enabling Youths and young women to have gainful skills to improve chances of their employment for enhancing their livelihoods and entrepreneurship. It reached out to 200 youths in Dibrugarh district.

Budget: INR 1,10,000.00

Digital Injot: Tea Tribe Video Content Project

To empower the Tea Tribe and Adivasi Community in Assam with relevant information and opportunities in local dialect, this project seeks to create **300+** content modules in audio-visual mode, developed by garden youths who will serve as local digital influencers. These influencers will advocate for positive changes in the community, overcoming social and cultural challenges. This project has already enabled the creation of **50** audio-visual contents, focusing on important government schemes and programmes for the community. **Budget: INR 73,000.00**

Knowledge Networks

Council for Social & Digital Development engage in a variety of events covering technology, social development, and community empowerment. Join workshops, seminars, lectures, and panel discussions where experts and enthusiasts share insights, expanding perspectives together.

The 8th eNorth East and the 7th CNX event brought together more than **150** stakeholders on various technological issues and innovations in the region.
Budget: **INR 3,00,000.00**

8th eNorth East (24-25 November 2023, Royal Global University)

The 8th e-North East platform, held during November 24-25, 2023, that took place at Guwahati in Assam, held in hybrid mode and the main event at the Royal Global University (RGU) Campus in Guwahati, engaged ICT / digital stakeholders of the indigenous, landlocked North East India Region towards building a safe, secured, innovative digital ecosystem with digital innovations and best practices, policies and programmes towards desirable development and governance outcomes. For details, please visit <http://enortheast.in>. The platform has been launched in 2010.

1st North East Internet Governance (NEIG) 2023

(24-25 November 2023, Royal Global University)

NEIG aims to engage stakeholders in discussions on Internet-related public policy issues in the North East Region of India. The inaugural event fostered dialogue on leveraging online opportunities while addressing challenges, following principles of the Global IGF and India IGF.

7th Community Network Xchange (CNX) 2023

(24-25 November 2023, Royal Global University)

The theme for the 7th edition of CNX in 2023 was Connecting Indigenous and Mountain Communities with a focus on the Asia Pacific region. It was a two-day event, held during November 24-25, 2023, that took place at Guwahati in Assam, one of the eight provinces/states in the North East Region of India. The event, held in hybrid mode and the main event at the Royal Global University (RGU) Campus in Guwahati, Assam in India, provided a platform for the stories of dedicated individuals contributing in improving digital connectivity in challenging geographical terrains and emphasized how their unwavering commitment and passion play a pivotal role in extending internet access to their respective communities.

INSIG 2023

(28 Sept-1 Oct 2023, IIT Guwahati)

The eighth edition of inSIG will be jointly organized by the inSIG Team and the Indian Institute of Technology, Guwahati. The Day 0 event is to be organized on 28 Sep 2022 and inSIG Day 1-3 will be organized on 29 Sep, 30 Sep, and 01 Oct 2023.

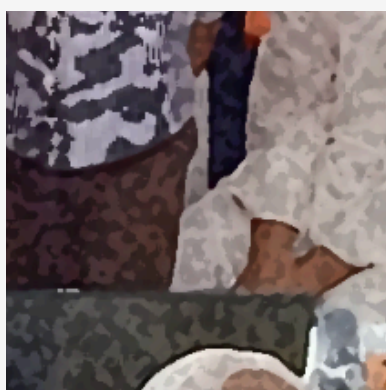

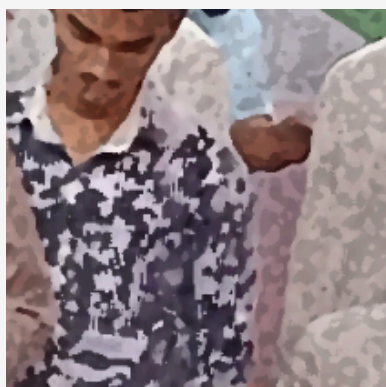

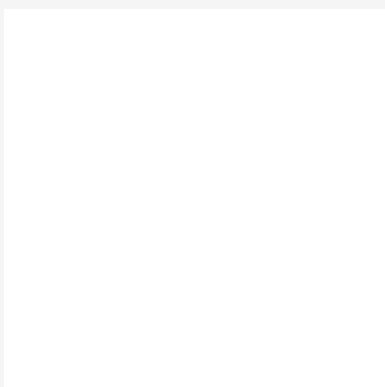

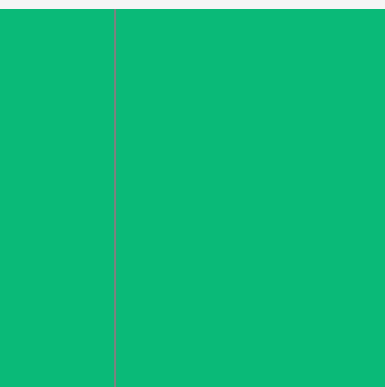

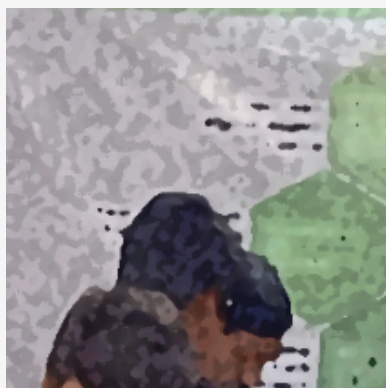

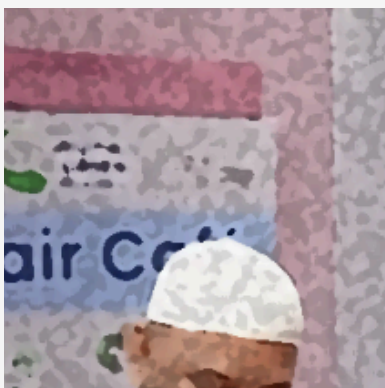

The eighth edition of the India School on Internet Governance brought together 48 National Fellows and 5 International Fellows. The event was well-documented and celebrated for its contributions to internet governance education.

PARTNERSHIP & SUPPORT

We express our gratitude to our valued partners, allies, interns, volunteers, supporters, and donors who have been steadfast co-travellers on our transformative journey. It is through their unwavering support that we persist in our mission to forge a digitally enabled society where no one experiences digital deprivation, and last-mile connectivity is a reality.

Your collaboration fuels our commitment to bridging the digital divide and creating a future where technology serves as an inclusive force for all.

Thank You
